

# Roads Report

## \$40 million for local roads

**Bland Shire Mayor Tony Lord has announced that Council will spend an estimated \$40 million on road works over the next three years.**

The announcement follows the adoption of Council's 2018-2019 roads program at its July monthly meeting and the confirmation of \$19.65 million in flood damage funding from the Roads and Maritime Service (RMS).

The flood damage funding was secured after almost two years of negotiations following the July and September 2016 floods and will fund road works on 185 roads spread across the Bland Shire over the next three years.

In addition, Council has adopted a 2018-2019 roads program incorporating works on 41 local roads.

"The flood damage funding will allow Council contractors to carry out long awaited works on local roads which were severely damaged during the 2016 floods to restore them to their previous condition," Mayor Lord said.

"Council has been in deep negotiations with the RMS for the best part of two years to ensure we receive fair compensation for the damage incurred to our road network and we thank the local community and rural residents in particular for their patience during this time.

"The flood damaged program will be strategically rolled out over the next three years by which time we expect the community will notice significantly improved conditions and outcomes.

"At the same time, Council remains

committed to its own road funding program which has identified 41 important local roads for works and repairs in 2018-2019 subject to weather and other circumstances."

In a landmark announcement, Mayor Lord said Council will spend almost \$20 million repairing flood damaged roads and a further \$20 million from its own budget over the next three years maintaining and improving the local road network.

Faced with the second longest road network in the state, Council is also committed to exploring

new technologies, techniques and practices in an effort to further improve road maintenance efficiencies and potentially deliver even greater benefits to local residents into the future.

Council plans to undertake a series of trials on Hollands Lane during the current financial year. A number of new and suggested techniques and materials will be tested and monitored for effectiveness and anticipated length of life.

As a potential future alternative for maintaining unsealed roads, Council will also complete a trial section of Jetpatcher seal on a small unsealed road near a town or village which is regularly used.

The roads program will be carried out by Council staff while the flood damage works, in order to meet NSW Government flood damage guidelines, will be completed by contractors. Council's roads program for 2018-2019 is listed right while the three year flood damage program is over the page.
